

the vertebral ribs and back. Breasts with ribs may be cut along the breastbone to make two approximately equal halves; or the wishbone portion, as described in paragraph (b)(3) of this section, may be removed before cutting the remainder along the breastbone to make three parts. Pieces cut in this manner may be substituted for lighter or heavier pieces for exact weight-making purposes and the package may contain two or more of such parts without affecting the appropriateness of the labeling as “breasts with ribs.” Neck skin shall not be included, except that “turkey breasts with ribs” may include neck skin up to the whisker.

(3) “Wishbones” (Pulley Bones), with covering muscle and skin tissue, shall be severed from the breast approximately halfway between the end of the wishbone (hypocleidum) and front point of the breastbone (cranial process of the sternal crest) to a point where the wishbone joins the shoulder. Neck skin shall not be included with the wishbone.

(4) “Drumsticks” shall be separated from the thigh by a cut through the knee joint (femorotibial and patellar joint) and from the hock joint (tarsal joint).

(5) “Thighs” shall be disjointed at the hip joint and may include the pelvic meat, but shall not include the pelvic bones. Back skin shall not be included.

(6) “(Kind) legs” shall be the poultry product which includes the thigh and the drumstick, i.e., the whole leg, and may include the pelvic meat, but shall not include the pelvic bones. Back skin shall not be included.

(7) “Wings” shall include the entire wing with all muscle and skin tissue intact, except that the wingtip may be removed.

(8) “Backs” shall include the pelvic bones and all the vertebrae posterior to the shoulder joint. The meat shall not be peeled from the pelvic bones. The vertebral ribs and/or scapula may be removed or included without affecting the appropriateness of the name. Skin shall be substantially intact.

(9) “Stripped backs” shall include the vertebrae from the shoulder joint to the tail, and include the pelvic bones.

The meat may be stripped off of the pelvic bones.

(10) “Necks”, with or without neck skin, shall be separated from the carcass at the shoulder joint.

(11) “Halves” are prepared by making a full-length back and breast split of an eviscerated poultry carcass so as to produce approximately equal right and left sides.

(12) “Quarters” consist of the entire eviscerated poultry carcass, which has been cut into four equal parts, but excluding the neck.

(13) “Breast quarter” consists of half a breast with the wing and a portion of the back attached.

(14) “Breast quarter without wing” consists of a front quarter of a poultry carcass, from which the wing has been removed.

(15) “Leg quarter” consists of a poultry thigh and drumstick, with a portion of the back attached.

(16) “Thigh with back portion” consists of a poultry thigh with back portion attached.

(17) “Legs with pelvic bone” consists of a poultry leg with adhering meat and skin and pelvic bone.

(18) “Wing drummette” consists of the humerus of a poultry wing with adhering skin and meat attached.

(19) “Wing portion” consists of a poultry wing except that the drummette has been removed.

(20) “Cut-up Poultry” is any cut-up or disjointed portion of poultry or any edible part thereof, as described in this section.

(21) “Giblets” consist of approximately equal numbers of hearts, gizzards, and livers, as determined on a count basis.

(22) “Major portions” of eviscerated poultry carcasses are either carcasses from which parts may be missing, or the front or rear portions of transversely-split carcasses.

[37 FR 9706, May 16, 1972, as amended at 39 FR 4569, Feb. 5, 1974; 63 FR 48960, Sept. 11, 1998]

§ 381.171 Definition and standard for “Turkey Ham.”

(a) “Turkey Ham” shall be fabricated from boneless, turkey thigh meat with skin and the surface fat attached to the skin removed. The thighs shall be

that cut of poultry described in § 381.170(b)(5) of this part.

(b) The product may or may not be smoked, and shall be cured using one or more of the approved curing agents as provided in a regulation permitting that use in this subchapter or 9 CFR Chapter III, Subchapter E, or in 21 CFR Chapter I, Subchapter A or Subchapter B. The product may also contain cure accelerators, phosphates, and flavoring agents as provided in a regulation permitting that use in this subchapter or 9 CFR Chapter III, Subchapter E, or in 21 CFR Chapter I, Subchapter A or Subchapter B; common salt, sugars, spices, spice extractives, dehydrated garlic, and dehydrated onions; and water for purpose of dissolving and dispersing the substances specified above.

(c) The cooked finished product weight shall be no more than the original weight of the turkey thigh meat used prior to curing.

(d) The product name on the label shall show the word "Turkey" in the same size, style, color, and with the same background as the word "Ham" and shall precede and be adjacent to it.

(e) The product name shall be qualified with the statement "Cured Turkey Thigh Meat." The qualifying statement shall be contiguous to the product name, without intervening type or designs, shall be not less than one-half the size of the product name but not less than one-eighth inch in height, and shall be in the same style and color and with the same background as the product name.

(f) If the product is fabricated from pieces of turkey thigh meat that result from the cutting through the muscle (as opposed the whole thighs intact or whole thighs with some incidental separation of muscle tissue during removal of the bone), the product name shall be further qualified by a descriptive statement. The product name of product fabricated from such pieces of turkey thigh meat equivalent in size to a one-half inch cube or greater shall be further qualified to specify that the product is "Chunked and Formed." The product name of product fabricated from such pieces of turkey thigh meat smaller than the equivalent of a one-half inch cube shall be further qualified to specify that the product is "Ground

and Formed" or "Chopped and Formed" as appropriate. The qualifying statement shall immediately follow and be contiguous to the statement required in paragraph (e) of this section, and shall be not less than one-half the size of the product name but not less than one-eighth inch in height, and shall be in the same style and color and with the same background as the product name.

§ 381.173 Mechanically Separated (Kind of Poultry).

(a) "Mechanically Separated (Kind of Poultry)" is any product resulting from the mechanical separation and removal of most of the bone from attached skeletal muscle and other tissue of poultry carcasses and parts of carcasses that has a paste-like form and consistency, that may or may not contain skin with attached fat and meeting the other provisions of this section. Examples of such product are "Mechanically Separated Chicken" and "Mechanically Separated Turkey."

(b) "Mechanically Separated (Kind of Poultry)" shall not have a bone solids content of more than 1 percent. At least 98 percent of the bone particles present in "Mechanically Separated (Kind of Poultry)" shall have a maximum size no greater than 1.5 mm (millimeter) in their greatest dimension and there shall be no bone particles larger than 2.0 mm in their greatest dimension.

(c) "Mechanically Separated (Kind of Poultry)" shall not have a calcium content exceeding 0.235 percent when made from mature chickens or from turkeys as defined in § 381.170(a)(1)(vi) and (vii) and (a)(2), respectively, or 0.175 percent when made from other poultry, based on the weight of product that has not been heat treated, as a measure of a bone solids content of not more than 1 percent.

(d) "Mechanically Separated (Kind of Poultry)" may be used in the formulation of poultry products in accordance with § 381.174 and meat food products in accordance with subchapter A of this chapter.

(e) Product resulting from the mechanical separation process that fails
